

CALBIO FIX

PRODUCT WITH SPECIFIC ACTION
Inoculation of mycorrhizal fungi

MICROORGANISMS

PERMITTED IN ORGANIC FARMING

BIOAGRONOMIC CHARACTERISTICS

CALBIO FIX is a bacterial complex that acts in the rhizosphere of the soil, allows the mobilization of calcium carbonate in the soil, an inert element that cannot be assimilated for the plant, going to develop carbonic acid in the nutrient solution that frees the calcium ions.

These microorganisms based on *Bacillus* spp, *Rhodobacillus* spp, *Megatherium* spp and others create a balanced system between microelements such as Iron, Magnesium, Calcium and Phosphorus Boron making them available to the plant.

FINAL RESULT

- Demobilization of the ground calcium equal to 25-40 units.
- Demobilization of soil phosphorus equal to 15-25 units
- Reduction of deficiencies of Iron and Boron.
- Increased consistency of the fruit and elasticity of the plant.
- Continuity of nourishment to the plant.

DOSES AND METHOD OF USE

Type of application: ON THE GROUND

VINE: 3-4 kg/ha

ARBOREALE: (Pome fruit, Stone fruit, Actinidia, Citrus and Olives)
3-5 kg/ha

ORCHARDS: 3 kg/ha

CEREALS IN OPEN FIELD: 3-4 kg/ha

GREENHOUSE: 300-500gr/1000mq

It is recommended to distribute it with 1 kg of STIM BLACK.

APPLICATIONS • Administer in the soil before or after sowing or transplanting. It should be applied with organic fertilizers in fruit plants through weeding bar and fertigation.

WARNINGS • *The product is miscible with most pesticides other than products containing copper or antibacterials. However, it is necessary, in any case, to perform a test before application. The manufacturer is not liable for damage caused by improper use of the product.*

COMPOSITION

Type of organic soil improver:
simple non-composted
vegetable soil improver

- Mycorrhizae content 0.1%
- Rhizosphere bacteria content 4×10^8 CFU/gr
- *Rhodobacillus* spp.
- *Megatherium* Spp.
- *Bacillus* spp.
- *Campylobacter*

FORMULATION LIQUID

PACKS

5 kg tank
10 kg tank
200 kg barrel
