

B-MAX

EC FERTILIZER
Borate fertilizer in solution (Boron ethanolamine)

PERMITTED IN ORGANIC FARMING

BIOAGRONOMIC CHARACTERISTICS

The product thanks to its special formulation, acts rapidly favoring the vegetative development of crops in all phenological phases of the plant, thanks to its stimulation improves the fecundity of the flower and in turn the engraftment of the fruit, facilitates the enlargement of the fruit allowing to increase productivity and quality of the crop.

FINAL RESULT

- Improvement of the general well-being of the plant.
- Qualitative and quantitative increase in production.
- Increased fruit set during flowering period.
- Early ripening.
- Increased elongation of the stalk.

DOSES AND METHOD OF USE

Type of application: FOLIAR

FRUIT TREES (Apple, pear, peach, kiwi, citrus, olive) 440gr/ha

HORTICULTURAL: (Tomato, Potato, Onion, Eggplant, Pepper, Artichoke, Melon, Watermelon) 440 gr/ha

SCREW: (Elongation of the spine) 440 gr/ha

APPLICATIONS • The first visible cluster treatment can be carried out on the vine, the second before flowering and the third after flowering. In fruit plants we recommend the first pink button treatment, the second in full bloom, the third 15 days after flowering and the fourth one month before harvesting. It is advisable to combine the product with the SPECIAL ENERGY or SPECIAL MAR.

WARNINGS • *The product is miscible with most pesticides excluding products containing copper or antibacterials. However, you must test before applying. The manufacturer is not liable for damage caused by improper use of the product.*

COMPOSITION

Boron (B) soluble in water 2%
Contains vitamins B1 e B3
