

# PLURIBAT

LIQUID COMPLEMENTARY FEED  
FOR ALL ANIMAL SPECIES

MICROORGANISMS

## COMPOSITION

- Vegetable Glycerine
- Bio technological additives:  
Lactic acid bacteria  
(MA18/5M)
- Cane Molasses

### Analytical constituents:

Humidity	< 30%
Crude protein	< 0.50%
Crude fibre	Tracks
Crude lipids	Tracks
Ashes	< 0.50%
Na	< 0.50%
Lysine	Not present
Methionine	Not present

## PACKS

10-200-1000 kg

## BIOAGRONOMIC CHARACTERISTICS

PLURIBAT is a complementary feed with microbiological additives that operate in the digestive metabolic system of the animal, speeding up the assimilation of protein substances and the reduction of nitrogen present in animal feces, accelerating the humification process and the reduction of ammoniacal nitrogen present.

## FINAL RESULT

- It helps the metabolism to assimilate nutrients, reducing waste substances in animal excrement.
- **Reduces odorous emissions by directing intestinal fermentations.**

## DOSES AND METHOD OF USE

For all animal species:

150-200 gr per 100 liters of drinking water

50 cc/hl in the case of pigs in the feed solution

Ric. N° alT000107VR
