

DOSAN

SPECIFIC ACTION PRODUCT
Inoculation of mycorrhizal fungi

ALLOWED IN ORGANIC FARMING

MICROORGANISMS

COMPOSITION

Type of organic soil improver:
simple non-composted
vegetable soil improver

- Mycorrhizal content 0.1%
- Rhizosphere bacteria content 10^7 CFU/gr

FORMULATION

SOLUBLE POWDER

PACKAGING

1 kg bag
5 kg box
10 kg box

SIAN Reg. No.

IT 44627/25

CERT. CCPB

N° 05/2018 MT

BIOAGRONOMIC CHARACTERISTICS

DOSAN is a microbiological product with a noble plant substrate that improves and increases the foliar assimilation of nutrients in plants. The use of this product allows the plant to optimize the functioning of the products that are combined.

DOSAN allows a better photosynthetic activity of the plant, allowing the microbiological system to create well-being for the vegetative system.

DOSES AND METHODS OF USE

Type of application: FOLIAR

It can be used on all crops both in the open field and in greenhouses:

Screw: 1-2 kg/ha

Arboreal, olive: 1-4 kg/ha

Cereals: 1-2 kg/ha

Horticultural: 1-3 kg/ha

Floricular: 1-2 kg/ha

At the minimum dosage you can reduce the dosage of insecticides.

APPLICATIONS

- It should be applied both with fertilizers and with pesticides, at the most suitable times for treatments. It does not create problems in the flowering phase of crops.

CAUTION

- The product is miscible with most crop protection products. However, it is necessary, in any case, to perform a test before application. The manufacturer is not liable for damage caused by improper use of the product.
