

KAISER

SPECIFIC ACTION PRODUCT
Inoculation of mycorrhizal fungi

ALLOWED IN ORGANIC FARMING

BIOAGRONOMIC CHARACTERISTICS

KAISER works by increasing biological activity with the development of the root system. A particular characteristic is that of having a subacid pH that increases the development of beneficial fungi in plants such as those belonging to the genus *Trichoderma* and *Clonostachys* (endophytes), at concentrations of 10^9 CFU/gr. It is known that these fungi have the ability to ensure greater plant well-being through natural mechanisms that, by increasing natural defenses, obtain greater resistance to pathogenic attacks.

FINAL RESULT

- Greater plant well-being both at root and leaf level
- Reduction of hyphae, mycelia, spores, on plants, and on soils
- Self-defense activation

DOSES AND METHODS OF USE

Type of application: FOLIAR / RADICAL

CULTURE	FOLIAR	RADICAL	NR Applications
VINEYARDS	1-3 kg/ha	3-5 kg/ha	2 Leaf 1 Root
ORCHARDS	1.5-2 kg/ha	4-5 kg/ha	4 Leaf 3 Root
CEREALS		1.5-2 kg/ha	1 Radical
HORTICULTURAL	2 kg/ha	3-5 kg/ha	1 Leaf 3 Root
LAWNS	2-3 kg/ha	3-5 kg/ha	3 Leaf 1 Root
LIVE		1.5-3 kg/ha	3 Radical

It is recommended to combine it with 1 kg of STIM BLACK.

APPLICATIONS • Can be distributed with hose or other equipment. It should be applied one or more times depending on the vegetative cycle of the crop.

In the vine, it should be used before "weeping", i.e. the emission of liquid from the xylem vessels at the level of the pruning cuts, and after mechanical pruning.

WARNINGS • The product is miscible with most pesticides other than products containing copper or antibacterials. However, you should test before applying. The manufacturer is not liable for damage caused by improper use of the product.

COMPOSITION

Type of organic soil improver:
simple non-composted
vegetable soil improver

- Mycorrhizal content 0.1%
- Rhizosphere bacteria content 10^7 CFU/gr
- *Trichoderma* 10^8 CFU/gr

FORMULATION

LIQUID

PACKAGING

1 kg
5 kg
10 kg
