

SPECIAL MAR

ORGANIC NITROGEN FERTILIZER
Fluid yeast extract containing brown algae

PERMITTED IN ORGANIC FARMING

BIOAGRONOMIC CHARACTERISTICS

SPECIAL MAR is an organic nitrogen fertilizer that acts as a stimulant for the crop, causing an increase in physiological functions. It reduces stress in adverse conditions or pathological processes and contains in a completely natural way numerous macronutrients with many organic molecules (phytohormones, polysaccharides, vitamins, amino acids) that produce a stimulating effect in the treated crops.

SPECIAL MAR is composed of algae belonging to the genus *Ascophyllum nodosum* Ecklonia Maxima, obtained from a cold extraction process, able to maintain the content of nutrients present in the algae, without modifying any of the physico-chemical characteristics.

DOSES AND METHOD OF USE

Can be used by foliar route

- Fruit crops (Apple, Peach, Actinidia, Cherry, Apricot): 2-2,5 kg/ha
- Vine size: 2-2,5 kg/ha
- Horticultural: (in Greenhouse and Open Field): 2-2,5 kg/ha
- Strawberry: 2-2,5 kg/ha
- Cereals: 2-2,5 kg/ha

APPLICATIONS • Use it from the beginning of the cycle to maturation with a frequency of 8 days, if necessary in hot and humid periods reduce to 5 days.

It has no shortage time and leaves no residue.

WARNINGS • The product is miscible with most agrochemicals, with products containing copper. **It is necessary, in any case, to perform a test before application.** The manufacturer is not liable for damage caused by improper use of the product.

COMPOSITION

Organic nitrogen (N) 1%
Organic carbon (C) of biological origin 10%
pH = 7,8
Organic matter with molecular weight <50kDa 30%

FORMULATION

Liquid

IMBALLAGE

1 kg bottle
5 kg tank

Reg. SIAN No.
11437/15
